No matter how hard it is driven over Australia's varying surfaces or how many love taps the normal wear and tear of life on the road delivers, your vehicle deserves more attention than the standard vehicle.

Sadly, no matter how much care you take, time will inevitably take its toll and after a few years, your vehicle begins to look slightly less magnificent than when it was first on the showroom floor. Unavoidable? Not at all. In fact, with the right attention and expert care, it can be restored to 'showroom condition', with a minimum of fuss and cost.

Permagard's Rejuvenation Packages put your vehicle through the full treatment - both inside and out with Permagard paint protection - a treatment developed by the aviation industry and used by Qantas, Virgin and major international airlines to maintain aircraft appearance and reduce maintenance.

## What is the rejuvenation process?

Extensive cleaning of the paint surface to remove all contaminants before it is assessed by a technician to ensure all micro-scratches, swirls and marks are filled in. Paintwork can now be re-sealed and restored to showroom condition. Yearly application will help maintain your vehicle's original condition.

“ **Paintwork can now be re-sealed and restored to showroom condition.** ”
