

I have been a prestige car buyer for many years.

I have always had paint protection applied to my car.

Most of my experiences with other products have been good with a few exceptions.

I was introduced to Permagard to consider application to my brand new white Mercedes.

The installers were amazingly thorough in its application. They covered every square inch of the duco.

The results are absolutely fantastic.

The car glistens in the sun, water just glides over the bonnet and Permagard has made washing the car a dream as nothing sticks to the duco that requires any more than a light rub.

My car is now 12 months old and still looks brand new and I'm certain it will be the same in ten years.

The other benefit of Permagard is it will stand out from all others when you decide to sell the car.

I have no association with Permagard and have not been asked to write the testimonial I have sent it to them as I was so thrilled with the outcome.

I highly recommend the installation of Permagard.
