To Whom It May Concern:

RE: PERMAGARD'S ANTIMICROBIAL SHIELD

I have been using Permagard's Antimicrobial Shield treatment on my fleet of corporate jets for well over 9 months.

I find its ability to eliminate odours to be incredible.

Protecting my crew and VIP clients from germs, viruses and bacteria is our highest priority.

Permagard has finally provided the industry with an exceptional product that is non-toxic and provides long lasting protection, as all other products are alcohol based which only sanitise the surface at the time of application.

I certainly have no problem giving it my seal of approval and will continue using it well into the future.
